

## Home Blood Pressure Monitoring Patient Instructions

Thank you for collecting the Omron device for blood pressure recording. Please ensure this is returned to Wallasey Medical Centre promptly after you have completed a weeks' worth of readings. Start collecting the results tomorrow and record the results on the chart on the next page.

To help ensure a reliable reading, avoid eating, smoking, or exercising for at least 30 minutes before taking a measurement. Remove any tight-fitting clothing from your upper arm.

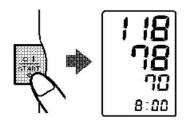

Please print the form below and complete as per the instructions below.

1. Sit on a chair with your feet flat on the floor and place your arm on a table so that the arm cuff will be at the same level as your heart.

- 2. Apply the arm cuff to your upper arm. The coloured marker should be centred on the inside of your arm and point down the inside of the arm, so that the air tube runs down the inside of your forearm and is in line with your middle finger.
- 3. Secure the cuff around your arm using the fabric fastener strip, ensure that your arm is supported by the table and completely relaxed.
- 4. Press the START button, ensure that you are relaxed

When measurement is complete, the monitor displays your blood pressure and pulse rate, and automatically deflates the cuff.

Please contact the Surgery 5 working days after you have returned the device and your readings, if you have not been contacted. Your Doctor will have left a message for you. Please ensure to remove the batteries after use. Thank you.
